

Behind The Scenes

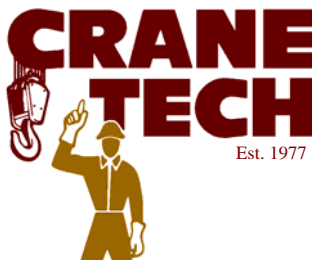

CRANE TECH

Volume 3

Control & Quality

There's more to delivering training than showing up and speaking to an audience. Crane Tech understands the importance of ensuring that every detail of your training is handled professionally and thoroughly. We set a high standard for ourselves, and Behind the Scenes provides an inside look at just some of the detail required for this level of quality.

More than what you expect..
...It's what you deserve!

Training & Compliance

What does it take to be a qualified person? Ask twenty people and you may get twenty different answers. Crane Tech has worked on this issue since 1977, and with thousands of operators trained, our methods ensure qualification through competency based training, written and practical testing.

The right stuff... It all starts with proper training. Attempt to deliver too much information over too short a period is like drinking from a fire hose. Avoid critical issues and adult learners become bored, even angered, when you waste their time. You've got to know what's required and deliver it.

Remove the bullet points... If your going to teach something it's important that each subject fits into a bigger picture. Bullet points leave too many loose ends and lack necessary detail. Comprehensive training includes practical information, presented clearly, that relates to the job.

According to most ASME standards, qualification requires one to demonstrate knowledge and to demonstrate skill. Written tests must be fair but challenging. Practical tests must ensure that subjectivity is removed so that each candidate has the same opportunity to demonstrate their skill.

Confidence improves when personnel achieve a high level of qualification. The reliability of your workforce improves when your personnel can be counted on to get the job done right... the first time.

Results you can see... We focus on individuals not groups. Knowledge and skill are greatly enhanced with proper compliance based training. In the end, it's all about reliability.
