

# Behind The Scenes

CRANE TECH

Volume 5

## Control & Quality

There's more to delivering training than showing up and speaking to an audience. Crane Tech understands the importance of ensuring that every detail of your training is handled professionally and thoroughly. We set a high standard for ourselves, and Behind the Scenes provides an inside look at just some of the detail required for this level of quality.

More than what you expect.  
....It's what you deserve.

## A Passion for Reliability

Bo Collier, President

Crane Tech's continuing goal is to help clients meet the demands of an evolving economy and diverse industrial and construction requirements.

We understand you work in the high-risk field of materials handling — but, we also know those risks can be eliminated by increasing your company's reliability. More than just a buzzword; 'reliability' means your workforce, equipment, and methods have the capacity to perform safely and efficiently in routine, as well as extreme or unexpected conditions.

Reliability reduces risk, increases your competitive advantage, improves your effectiveness, and reduces costs. Crane Tech brings these benefits by providing an accurate needs analysis, competency based training, expert technicians with years of practical experience, technology that keeps the programs and methods on track, and the commitment to deliver a service second to none - just as we have for more than 30-years.

The president of Crane Tech is Bo Collier, who leads the company with a passion for safety and reliability — both internally and for each client the company serves. Beginning his career path in engineering school, Bo later worked as rigger and crane operator before joining Crane Tech in 1978. He's held many positions over the years, but none as important as leading a company that's become known as the most reliable and technically skilled material handling training and consulting company in America.

Bo is an active Member of the National Commission for Certification of Crane Operators (NCCCO); serving on the Mobile Crane Written Exam Management Committee, Overhead Crane Committee, Rigging Committee and a member of the NCCCO Commission. He also sees that other employees continue their development and commitment to the industry by serving on such committees as the NCCCO Articulating Crane Committee and the newly formed NCCCO Crane Certifiers Task Force.
